Summary

Highly skilled DevOps engineer with 5+ years of experience in designing, implementing, and managing CI/CD pipelines, cloud infrastructure, and automation tools. Proficient in scripting languages, configuration management, and containerization technologies. Strong background in Agile methodologies and cross-functional collaboration. Passionate about improving software development processes and ensuring reliable and scalable deployments.

Work Experience

Senior DevOps Engineer, ABC Company

January 2019 - Present

- Designed and implemented CI/CD pipelines using tools such as Jenkins, GitLab CI/CD, and AWS CodePipeline, reducing deployment time by 50%.
- Automated infrastructure provisioning and configuration management using tools like Terraform and Ansible, resulting in consistent and scalable environments.
- Orchestrated containerized applications using Docker and Kubernetes, improving scalability and portability.
- Implemented monitoring and alerting solutions with Prometheus and Grafana, ensuring high availability and performance.
